WEB DEVELOPMENT PROJECT REPORT

CITY HOSPITAL WEBSITE

A Basic HTML5 and CSS3 Web Development Project

Student Name	HAJI VALLI
University	DR. RVR NRI UNIVERSITY
Course	B.Tech – CSE (AI & ML)
Academic Year	First Year

Submitted in partial fulfilment of the academic requirements

1. Introduction

The City Hospital Website is a simple informational webpage developed using HTML5 and CSS3. It presents essential hospital information in a clear and organised manner. The website introduces the hospital, lists its medical departments and doctors, displays available facilities and visiting hours, and provides an appointment form and emergency contact details.

The purpose of the website is to help visitors quickly find basic information about the hospital. Users can move between important sections through navigation links at the top of the page.

2. Objectives and Main Features

- Present the hospital name and a welcome message.
- Display Cardiology, Neurology, Dentistry and Pediatrics departments.
- Show two doctors and their specialities.
- List hospital facilities and visiting hours.
- Provide an appointment form with name, email and date fields.
- Display the ambulance number and phone contact.
- Provide internal navigation links to selected page sections.
- Change the navigation layout on narrow screens using a CSS media query.

3. Technologies Used

HTML5 – Creates the structure and content of the webpage using elements such as header, nav, section, form, input, button and footer.

CSS3 – Controls the visual presentation, including font, background colours, spacing, alignment, navigation links, form input layout and responsive navigation.

No JavaScript, database, backend framework or external image library is used in the supplied source code.

4. Webpage Description

4.1 Header and Navigation Bar

The top header displays a hospital emoji and the name “City Hospital”. It has a sky-blue background and 15 pixels of padding. The navigation bar contains Home, Departments, Doctors and Contact links. Each link points to an ID on the same page.

4.2 Home Section

This section contains the heading “Welcome to City Hospital” and a short sentence about the healthcare services provided.

4.3 Departments Section

Four departments are listed as separate paragraphs: Cardiology, Neurology, Dentistry and Pediatrics.

4.4 Doctors Section

The page displays Dr. Ravi as a Cardiologist and Dr. Priya as a Dentist.

4.5 Facilities Section

This section lists ICU, Pharmacy, Laboratory and Ambulance facilities. It also displays visiting hours as 10 AM to 5 PM. The section has no ID in the supplied HTML.

4.6 Appointment Section

The form contains Name, Email and Date fields followed by a Submit button. The fields are required, and the email field uses the email input type. This is only a front-end form; it is not connected to a booking system and does not save appointment data.

4.7 Emergency Contact Section

The section displays Ambulance: 108 and Phone: 9876543210 as text.

4.8 Footer

The footer displays "© 2026 City Hospital" on a sky-blue background.

5. Design and Styling

The webpage uses Arial and centres the text across the body. The page background is light Alice blue (#f0f8ff). The header and footer use sky blue, while each content section has a white background, 20 pixels of padding and 10 pixels of margin. Navigation links have black text, 10 pixels of margin and no underline. Form inputs are block elements centred horizontally, with 10 pixels of margin and padding. The Submit button has a green background, white text, 10 pixels of padding and no border.

A media query applies when the screen width is 600 pixels or less. At this width, navigation links become block elements and are arranged vertically with 8 pixels of margin. The CSS does not define a separate mobile grid or typography system.

6. Actual Webpage Output

The screenshot below was captured by rendering the supplied HTML and CSS together in Chromium at a desktop viewport width of 1365 pixels. The stylesheet was applied directly during browser rendering; the displayed page is the actual output of the supplied code.

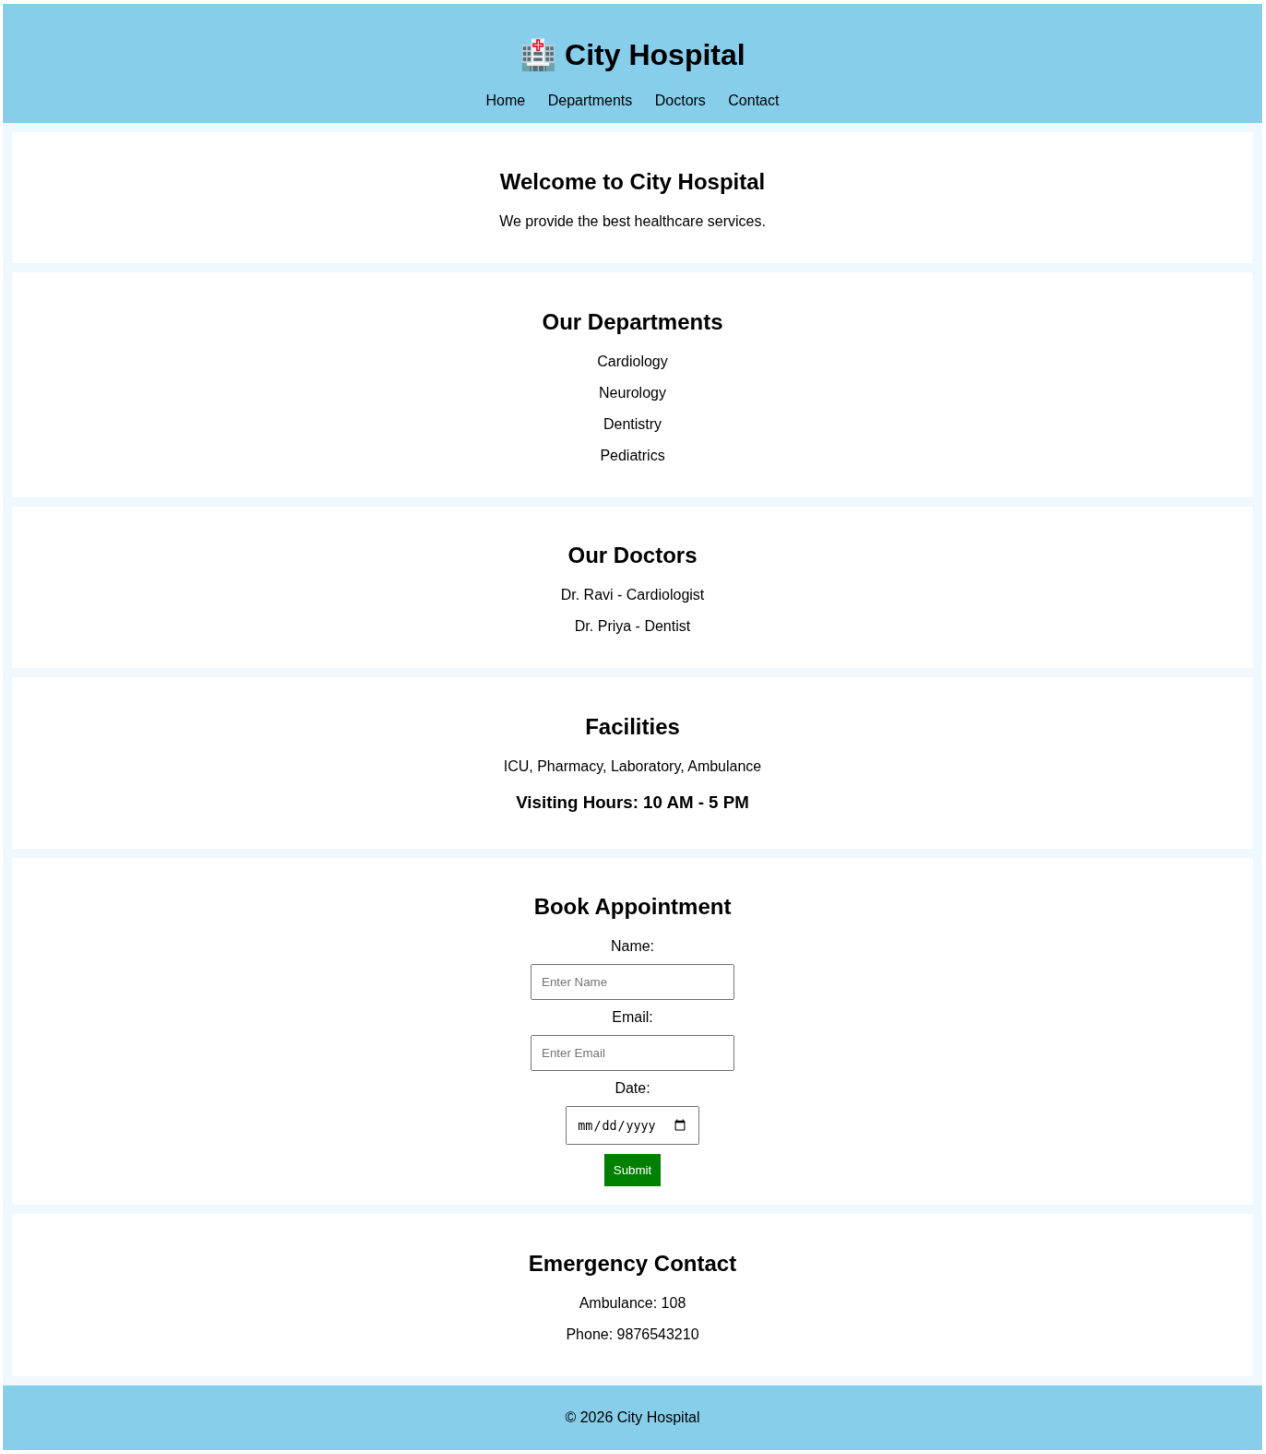

Figure 1: Actual rendered output of the City Hospital Website.

7. Output Explanation

In a desktop browser, a sky-blue header appears at the top with the hospital name and navigation links. Below it, white content sections appear against a light-blue page background. They present the welcome message, departments, doctors, facilities, visiting hours, appointment form and emergency contacts. The appointment inputs are arranged vertically and centred. A green Submit button appears below the date field, and the sky-blue footer appears at the bottom.

The Home, Departments, Doctors and Contact navigation links jump to their matching sections. The form uses browser-level required-field validation, but no appointment processing or data

storage is implemented. No photographs or external image assets are present in the source; the hospital emoji is part of the heading text.

8. Limitations and Possible Improvements

- Connect the appointment form to a backend service if requests need to be stored or processed.
- Add verified hospital address, email and more detailed service information if available.
- Associate each form label with its input using matching for and id attributes.
- Expand responsive styling and test the page on different devices.
- Add genuine hospital photographs or department icons only when suitable assets are available.

9. Conclusion

The City Hospital Website project demonstrates how HTML5 can structure a webpage and CSS3 can style its appearance. By developing this project, I learned to organise content into sections, create internal navigation links, build a simple form, apply colours and spacing, and use a media query to adjust navigation for smaller screens. This project provides a foundation for learning more advanced web development concepts.

10. Source Code

The complete source code supplied for this project is reproduced below. The HTML and CSS are shown separately, matching the linked stylesheet arrangement.

10.1 HTML Source Code (index.html)

```
<!DOCTYPE html>
<html>
<head>
    <title>Hospital Website</title>
    <link rel="stylesheet" href="hospi.css">
</head>
<body>

<header>
    <h1>□ City Hospital</h1>
    <nav>
        <a href="#home">Home</a>
        <a href="#departments">Departments</a>
        <a href="#doctors">Doctors</a>
        <a href="#contact">Contact</a>
    </nav>
</header>

<section id="home">
    <h2>Welcome to City Hospital</h2>
    <p>We provide the best healthcare services.</p>
</section>

<section id="departments">
    <h2>Our Departments</h2>
    <p>Cardiology</p>
    <p>Neurology</p>
    <p>Dentistry</p>
    <p>Pediatrics</p>
</section>

<section id="doctors">
    <h2>Our Doctors</h2>
    <p>Dr. Ravi - Cardiologist</p>
    <p>Dr. Priya - Dentist</p>
</section>

<section>
    <h2>Facilities</h2>
    <p>ICU, Pharmacy, Laboratory, Ambulance</p>
    <h3>Visiting Hours: 10 AM - 5 PM</h3>
</section>

<section id="appointment">
    <h2>Book Appointment</h2>
    <form>
        <label>Name:</label>
        <input type="text" placeholder="Enter Name" required>

        <label>Email:</label>
        <input type="email" placeholder="Enter Email" required>

        <label>Date:</label>
        <input type="date" required>

        <button type="submit">Submit</button>
    </form>
</section>

<section id="contact">
    <h2>Emergency Contact</h2>
    <p>Ambulance: 108</p>
    <p>Phone: 9876543210</p>
</section>

<footer>
    <p>© 2026 City Hospital</p>
</footer>
```

```
</body>
</html>
```

10.2 CSS Source Code (hospi.css)

```
body {
    font-family: Arial;
    margin: 0;
    background-color: #f0f8ff;
    text-align: center;
}

header {
    background-color: skyblue;
    padding: 15px;
}

nav a {
    margin: 10px;
    text-decoration: none;
    color: black;
}

section {
    padding: 20px;
    margin: 10px;
    background-color: white;
}

input {
    display: block;
    margin: 10px auto;
    padding: 10px;
}

button {
    background-color: green;
    color: white;
    padding: 10px;
    border: none;
}

footer {
    background-color: skyblue;
    padding: 10px;
}

@media (max-width: 600px) {
    nav a {
        display: block;
        margin: 8px;
    }
}
```

Appendix: Rendering Notes

Browser title: “Hospital Website”. Rendered page height: approximately 1568 pixels at the selected desktop viewport. The HTML references hospi.css, which was applied alongside the HTML during rendering. No external images, fonts or scripts were referenced by the supplied code.
